

FOR NEW CONSTRUCTION  
OR RENOVATION PROJECTS,  
Igloo Cellulose is an unparalleled  
thermal and acoustical insulation  
product.

Discover total comfort  
365 days a year.

*We have your health and the environment at heart.*

## Safe and healthy

Manufactured in Québec since 1977, cellulose is made of recycled newspaper, treated with natural products, is certified low in VOCs, and has a superior resistance to fire, corrosion, humidity, insects and vermin.

*It's the healthy alternative to traditional insulation products.*

# Economical

With potential annual savings of up to 25% on heating and air conditioning costs, insulation with cellulose allows for a return on investment within 3 years. It is one of the most profitable investments.

***You cannot afford not to have it.***

# Ultra-comfortable

Build it tight, build it right.  
Cellulose provides a tight building envelop for optimal control of temperature and humidity, thus obtaining natural comfort year-round.

*You will feel the difference.*

# No settling

Cellulose installed at a minimum density of 3 lbs/ft<sup>3</sup> in cavities by a qualified Igloo Cellulose installer, guaranties 100% no settling of the insulation.

*Satisfaction guaranteed*

# Soundproof

Compared to other insulation products, cellulose's high density and homogeneity confer it with equal or superior qualities for sound absorption of high and low frequencies, thus offering you an unparalleled acoustical comfort.

*Enjoy your tranquility.*

# Eco-friendly

Cellulose is made of 85% recycled newspaper and 15% natural additives.

*It is the greenest product in the industry.*

## Igloo Cellulose is a sensible, green and profitable choice.

Igloo Cellulose facilitates accreditation for the following programs :

- **Novoclimat<sup>MD</sup>**, for a new construction
- **Rénoclimat<sup>MD</sup>**, for renovation projects
- **LEED<sup>®</sup>** Certification
