

March 16, 2018

To Our Valued Duro Dyne Distributors,

Based on recent developments, Duro Dyne has deemed it necessary to modify our impending price increase originally scheduled for April 16, 2018. The unpredictability of current conditions affecting steel, aluminum and other raw material costs has required us to re-evaluate the 10% Dyn-O-Mate only increase that was previously announced.

With that said, Duro Dyne will be announcing a revised increase to now include all of our product line categories. Further details will be communicated in the near future. In addition, based on distributor feedback, we have made the decision to postpone our increase until **May 1, 2018**.

We apologize for this amendment, however we believe it is essential in these unprecedented times in order to insure we can continue to bring our valued products and service to the market.

As always, your Duro Dyne Territory Manager and our Customer Service Support Team are here to answer any questions or concerns you may have throughout this process.

We thank you for your patience and understanding as we all face these uncertain times. Your continued support and valued loyalty is greatly appreciated by Duro Dyne.

Sincerely,

A handwritten signature in black ink, appearing to read "David B. Krupnick".
