FIND THE RIGHT GLOVE FOR THE RIGHT CONDITION

West Chester Protective Gear® offers a wide variety of insulated gloves. From the light insulation of brushed knit to the heavy insulation of 150 gram Positherm®, we offer a glove to fit your job application in every environment. Be sure to choose the right level of insulation for your job. Too much insulation can make your hands sweat, and if you're very active you will stay warmer than if you're less active. Here is a chart to use as a guide:

CHOOSE THE RIGHT INSULATION

**EXTREME

POSITHERM® INSULATION

West Chester Protective Gear Positherm insulation is warm and durable, yet also lightweight and flexible. Made of polyester fibers, Positherm creates air pockets that trap and hold heat, reducing heat flow away from the body while repelling cold from the outside. Positherm is bonded to a tricot or fleece fabric that wicks away moisture, keeping hands dry and comfortable.
