GIC GENERAL

INSULATION COMPANY, INC.

2025

GIC GENERAL INSULATION COMPANY, INC.

General Insulation Company, Inc. is a wholesale distributor that stocks and fabricates a wide variety of industrial, commercial, and fire-stopping insulation products for the construction market, including a wide range of Safety Products. With a vast network of strategically located warehouses and fabrication facilities, General Insulation Company is uniquely positioned to service customer needs in a timely fashion with products that will meet their specific requirements.

TABLE OF CONTENTS

SELF-RETRACTING LIFELINES

General Insulation offers a full range of ANSI rated Class 1 and Class 2 self-retracting devices to help workers meet nearly every user requirement covering a wide variety of applications. Micron™ and BRUTE™ brands have become the preferred choice in construction, utilities maintenance, and general industries as they provide durable performance and reliability, supported with industry-preferred Level 3 ANSI independent 3rd-party testing documentation.

KStrong® New SRL ANSI Standard

**New ANSI Standards for Fall Protection SRLs**

ANSI/ASSP Z359.14-2021 standard has been recently updated to minimize confusion in the market as to proper use of Self-Retracting Lifelines (SRLs) in relation to anchor height requirements. Beginning in April 2022, KStrong began transitioning manufacturing of SRLs from current ANSI Class A/Class B to the new Class 1/Class 2 standard.

Classification Changes

SRLs will now be classified by two new class ranges: Class 1 and Class 2. The table below identifies Class 1 SRLs that are only to be used only on overhead anchorages and are subjected to a max free fall of 2 feet or less. Class 2 SRLs can only be used in applications where overhead anchorages may not be accessible and a structural edge is used instead; these can withstand a free fall of no more than 6 feet over an edge.

ANSI Z359.14-2014 (Old)	ANSI Z359.14-2021 (New)
Class A -Tested overhead with 282 lb. weight -Must arrest fall within 24" -Average force less than 1,350 lbs.	Class 1 -Tested overhead with 310 lb. weight -Must arrest fall within 42" -Average force less than 1,350 lbs.
Class B -Tested overhead with 282 lb. weight -Must arrest fall within 54" -Average force less than 900 lbs.	Class 2 -Meets Class 1 standards -Tested at foot level with 310 lb. weight -Arrest distance printed on label and instructions

SRLs must have Class 1 or Class 2 clearly labeled on the product as per the image below.
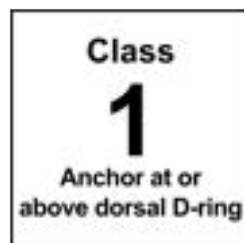

Also included in the ANSI Z359.14-2021 standard are testing requirements for a SRL-P, which is a self-retracting lanyard worn by the user on a full-body harness to be used as a fall arrest connector. Standard specifics are detailed in the table below.

Class 1 and Class 2 KStrong products are now available in the United States.

BODY WEAR

When it comes to your fall protection equipment, a full-body harness is one of the most important equipment choices you can make. While KStrong harnesses are built to meet or exceed ANSI standards and OSHA regulations, there is also comfort, lumbar support, positioning D-rings and accessibility in our body wear to provide workers with continued freedom of movement, sustained safety, and improved productivity while working at height or in confined spaces. KStrong Essential™, Elite™, and Epic™ harnesses provide workers with a very high degree of confidence, which directly affects the worker's productivity. While many of our safety harnesses can be used on most jobs, we also have innovative full-body harnesses for specific uses within different industries such as Oil and Gas, Utility, Tower, and Wind Energy.

UFK23110 | Aerial Bucket Kit with 5 pt. FBH, TB Legs, and 6' Clear Pack SAL with Snap Hooks | Sizes: S-M, M-L, L-XL

ANCHORAGES

Selecting an appropriate anchorage connector for your fall arrest system is a critical element in protecting a worker from fall and confined space hazards. Designed to fit a broad scope of general and specific user applications, our offering of anchorage connectors meets those requirements head-on by providing a secure point of attachment. Fall arrest anchors are identified by what they connect to such as steel anchors, concrete anchors, roof anchors and specialty safety anchors designed for your unique applications. Your worker can work with confidence knowing each connector is rigorously Level 3 ANSI tested and meets or exceeds industry standards.

Anchors | Concrete & Steel

UFA30070 | Parapet Anchor Clamp with Extended Movable Arm

UFA55370 | Single Seam Roof Anchor

ANCHORAGES

Door Jamb/Window Anchor

UFA30401 | Door Jamb/Window Anchor, adjustable 23.6" - 49.2"

• The Door Anchor provides a non–intrusive anchor point and can be easily installed inside the interior of a building or window opening enabling the most difficult jobs to get done safely and with confidence.
• Tje Door Anchor can be installed by just compressing it against the door or window frame, jamming itself between the two vertical sides.
• It is constructed of Aluminum alloy, hence it is highly corrosion resistant and is lightweight, weighing less than 10.7 lbs.
• The arms of the Door Anchor are adjustable enabling installation on door/window frames of width from 23.62" to 49.21".
• Fast and easy Installation with built in adjustment knob hence no tools or drilling is required.
• Extremely portable design for easy transport, storage and usage. Every Door Anchor is provided with a deluxe carrying bag.

UFC405100 | Tie-back snap hook with 5000 lb. rated gate.

UFC408100 | Large rebar hook, stamped - 2.63" opening

DROP PREVENTION

Kaptor™ tool lanyards are designed to reduce the risk of a dropped tool injuring anyone positioned below a worker. The worker's use of a tool securely attached to a Kaptor™ tool lanyard should significantly reduce the chance of an injury from occurring to workers or others below. Tool lanyards are designed to be attached securely at one end to a worker or to a suitable structure, with the other end attached to common hand tools.

Kaptor™ Drop Prevention
