

USA PRICE INCREASE NOTICE

Effective Date: April 15, 2025

Dear Valued Customer,

We thank you for your continued support and allowing Ideal Products to serve you and your team.

We are writing to inform you of necessary price adjustments, effective April 15, 2025, due to rising material costs and external market factors beyond our control. After careful consideration, we will be implementing the following approximate increases:

Aluminum Rolls, C&R Jacketing and Sheets	25%
Aluminum Fittings	20%
Stainless Steel Rolls, C&R Jacketing and Sheets	7%
Stainless Steel Fittings	20%
All Metal Accessories (including banding, fasteners, springs, screws, etc.)	7%

This decision is driven by several factors, including rising raw material costs, logistical challenges, and global economic pressures affecting our industry. Additionally, ongoing geopolitical issues continue to create market instability, which may lead to further cost increases in the future. We are closely monitoring these developments and will keep you informed of any additional adjustments as needed.

Ideal Products may impose limits on product orders if requested volumes differ from typical purchasing history.

If you have any questions or would like to discuss how these changes may affect your business, please do not hesitate to reach out to your account

manager or our customer service team.

Thank you for your continued partnership and understanding. We truly value your business and look forward to working with you through these challenging times.

Sincerely,

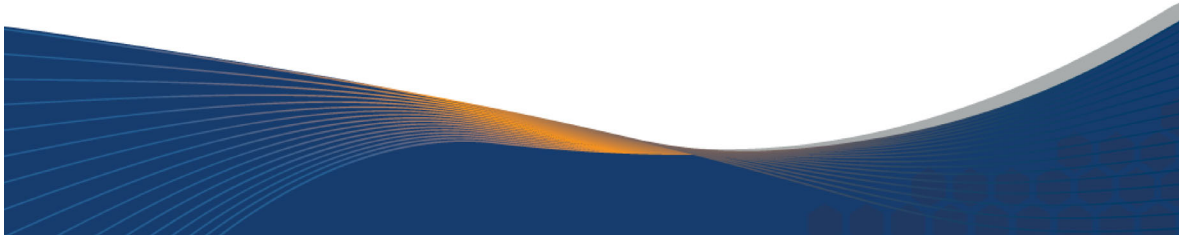

Marissa Davis
