## Why Builders are Choosing TimberBoard

TimberBoard is a rigid wood fiber insulation panel for continuous exterior walls. Manufactured in Maine from residual wood fiber, it provides dependable thermal performance, jobsite durability, and straightforward installation.

- ▶ **Code-Approved Continuous Insulation:** Meets today's energy codes, integrates easily into standard wall assemblies.
- ▶ **Cost-Competitive:** High-performance insulation at pricing comparable to foam and mineral wool.
- ▶ **Vapor-Open Moisture Control:** Sheds bulk water while allowing walls to dry, helping reduce risk of condensation, mold, and rot.
- ▶ **Fire Resistant:** Tested to ASTM E84 Class B Flame/Smoke (even without added retardants).
- ▶ **Built-In Sound Dampening:** Dense wood fiber structure adds sound-dampening mass to exterior wall assemblies.
- ▶ **Made in the USA:** Manufactured in Maine from regionally sourced residual wood fiber.
- ▶ **Reliable Lead Times:** Domestic production supports predictable scheduling and fewer supply chain surprises.
- ▶ **Crew-Friendly Material:** Non-toxic, itch-free, and cuts and installs with standard tools.
