OUR REPUTATION IN EVERY BAG

March 5, 2026

Dear Valued Customer:

Due to significant increases in the cost of polyethylene resin and tightening supply conditions within the North American plastics market, Aluf Plastics must implement a price adjustment on our products.

Over the past several weeks, virtually all major polyethylene producers have announced resin price increases of \$0.10 per pound effective March 1, 2026, with additional increases announced for April. These increases are being driven by global supply dynamics, strong demand across packaging markets, and continued feedstock cost pressures.

As polyethylene resin represents the primary raw material used in the manufacture of our products, these increases have materially impacted our cost structure.

Effective April 1, 2026, Aluf Plastics will implement a price increase of 10% on all orders placed on or after this date.

We will continue to monitor raw material markets closely and work diligently to manage costs wherever possible. Unfortunately, the magnitude of the recent resin increases requires us to adjust our pricing accordingly.

We reserve the right to limit order quantities and will only accept orders that fall within our standard lead times.

The owners and employees of Aluf Plastics sincerely appreciate your business and the confidence you place in our company. We remain committed to being your most reliable supplier and preferred partner.

Your Aluf Plastics sales representative will contact you regarding this change and to answer any questions you may have.

Sincerely,

David Anderson
Vice President of Operations
Aluf Plastics
