Re: Price Increase Notice

Dear Customer,

We would like to inform you that, effective June 1, 2026, Design Polymerics (DP) will implement a price increase on the following select products:

Re: (see below attachment for impacted products and increase)

All orders placed and shipments made on or after this date will reflect the updated pricing. Updated pricing will be provided, and your DP representative will review any specific impacts with you as needed.

This adjustment is necessary due to continued inflationary pressures impacting key raw materials, including polymers, resins, and specialty additives, as well as rising costs in packaging, energy, and transportation. While we have worked diligently to offset these increases through internal efficiencies and supply chain optimization, the current cost environment requires us to take this step to maintain the quality, consistency, and reliability you expect from DP products.

We have made every effort to minimize the impact of these increases and are only adjusting pricing on products where costs can no longer be fully absorbed. This approach is intended to maintain strong alignment and long-term partnership with our customers.

We remain committed to delivering high-performance sealant and adhesive solutions, along with the service and technical support that help drive your success. We greatly value our partnership and appreciate your understanding as we navigate these market conditions together.

If you have any questions or would like to review the impact on your specific product mix, please contact your DP sales representative.

Thank you for your continued business and trust in Design Polymerics.

The Design Polymerics Team

Re: Price Increase Notification

Duct Sealants: (3.5%)

- DP 1010
- DP 1015
- DP 1020
- DP 1030
- DP 1040
